

Utility Coveralls

United's polyester/cotton all purpose coverall

Ripstop fabric ensures lasting durability

Elastic at waistband provides extra comfort

Covered chest pocket and pencil pocket on sleeve

Velcro at sleeves and ankles for better fit

Made in the U.S.A. – Berry Compliant

United's utility coverall is constructed from polyester/cotton ripstop fabric. The fabric is more durable than the standard issued cotton coverall and will keep the wearer more comfortable in various weather conditions.

This coverall has an expandable waistband for a snugger fit at the waist. It has a fly to neck covered zipper and adjustable VELCRO® at the wrists and ankles. The legs are flared from the knee to the ankle so the user can slip it on over their boots. We added two large covered chest pockets with VELCRO® closures and 2 pencil pockets on the upper arms.

The overall design of this coverall will provide the user with a comfortable range of motion for numerous activities.

Berry Compliant
